

# The State of CSS survey returns

**The State of CSS Survey** — This year's State of CSS survey is now open. It's well worth taking a few minutes to fill it out and share your thoughts. The results will highlight the latest CSS trends, and always makes for an interesting read. [Last year](#) reiterated the rise of Grid, how more folks are using VS Code, and just how little love Print stylesheets get. Sacha [outlines what's new in this year's questionnaire here](#).  
RAPHAËL BENITTE & SACHA GREIF

**The Case for 'Developer Experience'** — In a world of 'no code', SaaS, and APIs, Jean presents a considered take on the evolving developer experience, and embracing the messy reality of the tech stack.  
JEAN YANG

**Consent Management Without Endless Configurations** — Transcend Consent ensures nothing is tracked without user consent, without sacrificing site performance or UX. The only solution that is fully compliant across all 200+ tracking technologies – all in a lightweight, 30KB bundle.

**RenderingNG: An Architecture That Makes and Keeps Chrome Fast for The Long Term** — Highlights the long-term [rendering journey of Chrome](#) over the past eight years.  
CHRIS HARRELSON (GOOGLE)

**How to Win at CORS** — Jake, developer advocate at Google, outlines all he knows about [Cross-Origin Resource Sharing](#) (CORS) in an effort to help make sense of things. There's a [demo/playground](#) here to help illustrate things.  
JAKE ARCHIBALD

**Lots to See in Firefox 93** — ...including AVIF image format support. [Here's the full developer rundown](#).  
RUTH JOHN (MOZILLA)

## ⚡ Quick bits:

- It's been 27 years since [the first proposal of 'Cascading HTML style sheets' was published](#).
- Microsoft have tweaked [how Edge processes show up in Windows Task Manager](#). These look to be some rather handy changes.
- Adobe is alleged to have used the DMCA to shut down a project that's [aiming to keep Flash alive](#).
- Here's a look at [13 'tiny and terrific' entries](#) from the recent Js13kGames competition. These are always fascinating.
- Halloween is coming, as such here's [a dozen spooky looking fonts](#) — should you have a need.

## 📖 Tutorials, Articles & Opinion

**Safe DOM Manipulation (in the Future) with the Sanitizer API** — The new [Sanitizer API](#) (edited by developers from both Google and Mozilla) aims to build a robust processor for arbitrary strings to be safely inserted into a page. Something to look forward to.  
JACK J (GOOGLE)

**Myths About Web Accessibility** — A collection debunking some common web accessibility misconceptions or myths (*such as accessibility being difficult, expensive, etc*).
