

# Issue #486: Reverting Animations, :has() selector

## cssweekly

Issue #486 • December 22, 2021

[view online version](#)

### The CSS :has() Selector Is Way More Than a “Parent Selector”

```
/*
 * Matches <img> elements that is a
 * child of a <figure> that contains
 * a <figcaption> child element
 */
figure:has(figcaption) img { ... }
```

Bramus Van Damme gives an introduction to :has() selector, already available in Safari Technology Preview 137.

### CSS Custom Properties

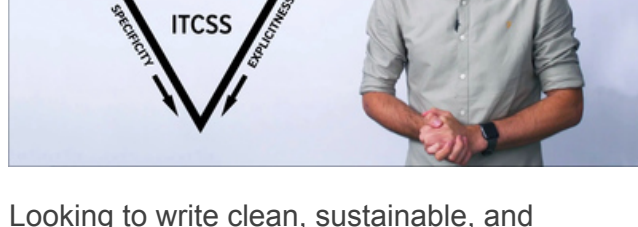

```
$color-link: blue !default;
$font-sizes: (
  "small": .875rem,
  "normal": 1rem,
  "medium": 1.25rem,
  "large": 2rem
) !default;
```

Stephanie Eckles shares an excellent, in-depth introduction to CSS variables while explaining how they enable incredible flexibility throughout your stylesheets.
