

Conditional CSS, and a guide to using modern image formats.

Using Modern Image Formats: AVIF and WebP

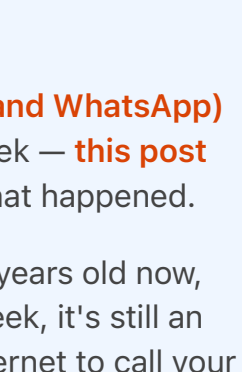

— Highlights how modern image formats (such as AVIF or WebP) can improve compression by up to 50% and deliver better quality per-byte while still looking visually appealing. Compares what's possible at high-quality, low-quality and file-size targets.

ADDY OSMANI

Proposal for CSS @when — The CSS Working Group recently resolved to adopt a proposal for **adding when/else rules** — this sorta stuff will make handling complex media queries much easier to cope with.

CHRIS COYIER

Consent Management Without Endless Configurations — Transcend Consent ensures nothing is tracked without user consent, without sacrificing site performance or UX. The only solution that is fully compliant across all 200+ tracking technologies – all in a lightweight, 30KB bundle.

A Guide to CSS Debugging — Debugging in CSS means figuring out what might be the problem when you have unexpected layout results. This post looks at a few categories that bugs often fit into, how to evaluate the situation when you find some, and explore techniques that help prevent such bugs.

STEPHANIE ECKLES

⚡ Quick bits:

- Yep, **Facebook (along with Instagram and WhatsApp) suffered a major outage** earlier this week — **this post from Cloudflare** attempts to dig into what happened.
- **This article from Matthias Ott** is a few years old now, but following Facebook's outage this week, it's still an apt reminder to have a corner of the internet to call your own (preaching to the converted here no doubt).
- Starting with version 93, **Firefox will monitor available system memory** and, should it ever become critically low, will respond by unloading memory-heavy but not actively used tabs.
- Following changes in Windows 11 both **Brave and Firefox will intercept links** that force-open in Microsoft Edge.
- **Here's a quick comic from Julia Evans** explaining cross-origin resource requests (aka CORS).
- Google has **dropped support for IE11** in its core search experience – users will now get a 'fallback experience' instead.
