Free Guide: The Evolution of JavaScript Tooling

Frameworks and libraries have been created to ease the burden of writing complex UI code. Learn how to deliver applications faster, better, and on budget

tables showing some features that are at various stages of approval.

Mission communication industry. are some interesting ones in those tables:

environments.

• JSON Modules - Builds on another proposal called Import Assertions to add the ability to import a JSON module in a common way across Java • Error Cause - Adds a cause property in an options parameter in the Error () constructor. This aims to simplify some complex debugging involving deep internal methods. • Array find from last - Adds .findLast() and .findLastIndex() methods on arrays and typed arrays. These will help to find an element (

calls and provides a practical alternative to extending built-in prototypes.

Once in a while you may want to take a look at what's in the pipeline when it comes to new JavaScript features (specifically in the ECMAScript spec). The official GitHub account for Ecma International (the standards body that oversees advances in the language) has a proposals repository that inclu-Ecma develops and publishes international standards for the information and

Tools for Web Developers Issue #424 • September 2, 2021

WEB VERSION

• New Set methods - For example, Set.intersection(), Set.union(), Set.isSubsetOf(), Set.isSupersetOf(), etc.

• Records & Tuples - Introduces two new deeply immutable data structures to JavaScript. One is object-like (# { x: 1, y: 2 }) and the other.

• The Pipeline Operator - This operator (commonly found in other programming languages) looks like: |> and will help to streamline chained full

There are lots of others listed in the repo and you'll also find links to other proposals that are at stage 0 or stage 1, and therefore are not too far along
