react-native-star-rating-widget

A React-based framework for building data-intensive applications that ships with the Ant Design System, an enterprise-level UI toolkit. **NextUI**

A tiny (~400 lines unminified) component framework that uses native web components with no build process - ideal for Jamstack sites.

ultimate-saas-ts An opinionated template to quick-start a SAAS project using Typescript, Next.js, NextAuth.js, Prisma, Stripe, Tailwind, and PostgreSQL. Inovatik

A beautiful, responsive, open-source, fast, and modern React UI library that's themeable and has light and dark UI modes.

A set of beautifully-designed Tailwind CSS UI blocks grouped by category and compatible with Tailwind's default config.

A set of 20+ free HTML templates that include images for use in any project and no attribution required.

Free HTML templates for websites and landing pages

with included images, no attribution required and simple license

High-performance web rendering engine, built on Flutter and compatible with Vue, React, and an older framework called Rax.

react-portfolio-template A clean, beautiful, minimal and responsive portfolio template for developers to showcase their work. **Next js Blog Boilerplate**

A starter project to build a blog built with Next.js, TypeScript, ESLint, Prettier, PostCSS, and Tailwind.

Participate in 10-15 min research surveys and get paid for your feedback. Earn up to \$90-\$200/hr. sponsored

A mobile-first React prototyping tool built for mobile developers, with React-Bootstrap component integration.

A performant, robust starting point for any React application using XState and Next.js.

The React version of MDB, a UI kit based on Bootstrap 5 and Material Design 2.0.

Mobile Tools and React Native Wynter

A customizable, animated star rating component for React Native, compatible with iOS and Android and written in TypeScript. **React Native Header Views** Add a fully customizable "Header View" to your React Native app with multiple design options.

A library that lets you add a 360 degrees product view to your React Native and Expo apps.

An iOS or Android app to detect color palettes in the real world using your phone camera, powered by Vision Camera for React Native.

lmage360viewer 360 degree view image

react-native-swipe-list-view A React Native ListView component with rows that swipe open and closed. react-native-modal-datetime-picker A React Native date/time picker for Android and iOS.

A popular camera component for React Native that also supports barcode scanning.

React Native component to add a loading/splash screen to your app when it boots up.

CLI tool for generating all the necessary iOS and Android application launcher icons for React Native projects from a single SVG source file.

A React Native module to add in-app purchases to your mobile app, compatible with Android, iOS, and Amazon.

A JavaScript utility to extract data from a web page using Puppeteer. **Analytics** A tiny open-source analytics abstraction library for the browser and Node.js.

A free daily newsletter that keeps you informed and entertained. Find out why over 3 million people read

A React Native pure JavaScript popover component, as a replacement for an older library that's now out of date.

Partytown Experimental library that allows you to relocate resource-intensive third-party scripts off the main thread

Adds a keyboard shortcuts interface to a website, and can be integrated in plain JavaScript, React, Vue, or

Blobity Free to use for open-source projects. A cool library that adds unique functionality to the cursor (animations, hover effects, tool tips, etc) on any page.

A lightweight JavaScript library to create stunning touch-friendly 3D parallax hover effects.

A simple and lightweight cookie/tracking consent manager to implement a simple 'accept' or 'deny' dialog

A small CommonMark or GitHub-flavoured Markdown-compliant markdown parser with positional info and

country-code-emoji A utility to convert country codes (ISO 3166-1 alpha-2) to corresponding emoji flags (unicode regional indicator symbols).

A pixel-perfect open-source Discord chat widget to add to a website that requires Node.js 10+ and Yarn.

A lightweight, dependency-free and fast JavaScript function written in TypeScript that generates color

Tech Productivity - Newsletter for tech pros who want to get stuff done. ad **Backlight.dev** - An all-in-one design system platform for front-end teams.

ValueTools - An essential toolset to boost developer productivity. A Tweet for Thought This is cool! I had no idea GitHub gives out these types of awards.

seem to be any indication that there's more coming. Thanks to everyone for subscribing and reading!
