Handling colors in CSS

HSL, HWL, LAB and LCH - A detailed look at the best ways to handle colors in CSS today, plus some tips for

using them in a design system, and what to expect from colors on the web in the not-too-distant future. MICHELLE BARKER 'My Custom CSS Reset' — In this meticulous post Josh outlines the rationale behind his own, custom CSS reset —

detailing each rule, what it does, and why you may want to use it. "In the past, I'd use a typical CSS reset, but times have changed, and I believe I have a better set of global styles!" JOSH W. COMEAU

Put the "Flow" in Your Workflows with Shortcut — Whether you're a startup that iterates quickly by giving engineers a free pallet of Red Bull, or a large org that has strict ship dates to hit, Shortcut is the ideal solution for task management, bug tracking, iteration planning, and reporting. Chrome 97: WebTransport, New Array Static Methods and More — Version 97 of Chrome is now in beta. This release features support for the font-synthesis CSS property — which controls whether user agents are

allowed to synthesize oblique, bold and small-caps fonts when a font family lacks such faces. The Chrome team is also thinking about what happens when it reaches Chrome 100. GOOGLE Quick bits: A preview of the 2021 Web Almanac is now available, featuring an early look at chapters covering privacy, performance, structured data, and more.

 Microsoft announced plans to add a browser level 'Buy Now, Pay Later' option for ecommerce purchases

natively into Edge — fair to say it hasn't gone down well

Twitter has rolled back support for AMP and will no longer sends users to AMP pages. Netlify has raised over \$100m to grow its developer platform and extend the Jamstack ecosystem.
