WEB VERSION

Testim is an AI-powered UI test automation tool that gives developers an easy way to author and maintain cross-browser tests. Spend less time creating

From Google Developers' web.dev, a collection of layout patterns built using modern CSS APIs that will help you build common interfaces such as cards

A minimal CSS framework for semantic HTML. Elegant styles for all natives HTML elements without classes, and dark mode automatically enabled.

Unstyled, responsive UI primitives for React Native and web. Includes TypeScript support, a simple API, dark mode, theming features, atomic classes, a

In developer preview. A React-based front-end framework that includes structure, components, and tooling for building custom storefronts in Shopify.

A modern, comprehensive, flexible design system that gives you all modular blocks you need to build sensible web apps and SaaS products.

A React Native boilerplate supporting multiple platforms: Android, iOS, macOS, Windows, web, browser extensions, and Electron.

A cookie-cutter React portfolio template suited for GitHub Pages, built with Chakra UI. Just edit data.json and config.ts to fit your needs.

A powerful front-end library of Tailwind components enhanced by vanilla JavaScript that helps you build interfaces with advanced interactions and anima

A set of 65+ lightweight mobile UI components built on Vue, written in TypeScript, with each component averaging about 1kb in size minified and gzip'd.

Ô

Testim is an AI-powered UI test automation tool that gives developers an easy way to author and maintain cross-browser tests. Spend less time creating, editing, and updating UI tests and more time innovating in your app. **Start Testing for Free** It's possible you're going to have some down time in December, so if you're looking to refine, update, or supplement your current coding skills, now is a good time to check out deals on web development courses. The ones I always recommend are from Wes Bos who, as usual, is having his annual half-price sale on all his courses. All the links here are affiliate links, so I'll get a cut if you make a purchase – just another way you can support this

newsletter.

• Master Gatsby - Build modern websites with React, Gatsby and friends. Learn to use a headless CMS, Scoped CSS, and Serverless Functions. • Beginner JavaScript - A fun, exercise heavy approach to learning Modern JavaScript from scratch. This one is for absolute beginners to intermediate devs who want to absolutely nail their JS Fundamentals. Advanced React and GraphQL - Build a full-stack online store in React.js, Keystone.js, Apollo, GraphQL, Next.js and Stripe with server-

side rendering and JWT based authentication.
